IRIS KAEMPFERI

Among the most gorgeous of all flowers, their rich colorings, silky petals and lovely form make them known as Rainbow Iris or Orchids of the Garden.

Every garden should display them, in masses, around pools, or in the border.

Easily grown, not only are their flowers most showy, often eight inches across, but after their long blooming season, from May to July, the foliage is very attractive.

We have a grand collection of large flowered Iris Kaempferi.

Holland Grown TULIPS

Again our gardens can be filled with these gorgeous spring flowers, for unless unforeseen shipping difficulties develop, we will have a generous shipment of bulbs from our Holland grower.

In the years before the War, Paul J. Howard made annual visits to the Holland bulb fields, studying the best varieties and crops. His lifetime familiarity with gardens in California enables us to offer those varieties that are best adapted to our climate. Also, we import bulbs of a much larger size than those usually offered in catalogs.

Through all the period of occupation of their country by the Nazis, our Holland grower has maintained a stock of the better varieties of Tulips and Hyacinths, but of course not as plentiful as in prewar days. So we are indeed fortunate to be able to expect such a wonderful shipment.

It will reward you in garden beauty to come or send to California Flowerland for all your bulbs.
